

Termux:Float

From Termux Wiki

Jump to: [navigation](#), [search](#)

This addon provides the Termux console in a floating window.

Installation

Download add-on from F-Droid [🔗](#)

Important: Do not mix installations of Termux and Addons between Google Play and F-Droid. They are presented at these portals for your convenience. There are compatibility issues when mixing installations from these Internet portals. This is because each download website uses a specific key for keysigning Termux and Addons.

low priority; R, runnable (on run queue); S, sleeping; T, traced or stopped; Z, defunct (*zombie*).

In contrast to most commands, the `h` option preceding `ps`'s options is optional, not mandatory. Thus, the following could be used (and sometimes is) in place of the above command:

```
ps aux | less
```

An alternative set of options for viewing the processes running on a system is

```
ps -ef | less
```

The `-e` option generates a list of information about every process currently running. The `-f` option generates a listing that contains fewer items of information for each process than the `-l` option.

Among the columns displayed by `ps -e` is `USER`, which contains the username of the account that owns the process (which is usually the same user that started the process) and `START`, which displays the time the process started, or the starting date if it started more than 24 hours ago.

The processes shown by `ps` can be limited by the `-t` option, which restricts the
