

# Termux:Tasker

---

From Termux Wiki

Jump to: [navigation](#), [search](#)

This add-on provides a Tasker plug-in to execute Termux programs.

## Installation

Download add-on from F-Droid [🔗](#)

**Important: Do not mix installations of Termux and Addons between Google Play and F-Droid.** They are presented at these portals for your convenience. There are compatibility issues when mixing installations from these Internet portals. This is because each download website uses a specific key for keysigning Termux and Addons.

## Usage

Create a new Tasker Action. In the resulting Select Action Category dialog, select Plugin. In the resulting dialog, select Termux:Tasker. Edit the configuration to specify the executable in `~/.termux/tasker/` to execute, and if it should be executed in the background (the default) or in a new terminal session.
