This page **is incomplete**. Please help to improve it.

Termux is a DVR (Digital Video Recorder) in the palm of my hand, as well as in my pocket.

1. `pkg install python`
2. `pip install youtube-dl`
3. `pkg install play-audio`

```
$ while true; do play-audio favoriteSong.file; done
```

This will play your favorite song forever. Use ctrl+c to exit this eternal trance loop.
