

Termux-sms-list

From Termux Wiki

Jump to: [navigation](#), [search](#)

List SMS messages.

Usage

termux-sms-list [options]

Output displayed in json format.

Options

```
-d          show dates when messages were created
-l limit    offset in sms list (default: 10)
-n          show phone numbers
-o offset    offset in sms list (default: 0)
-t type      the type of messages to list (default: inbox):
             all|inbox|sent|draft|outbox
```

Note

Usage of this API is no longer allowed by Google and we had to disable it to prevent delisting of Termux:API application from the Google Play.

The return message is:

```
{"error": "Reading SMS is no longer permitted by Google"}
```
