

# Termux-toast

---

From Termux Wiki

Jump to: [navigation](#), [search](#)

Show text in a Toast (a transient popup).

## Usage

`termux-toast [options] [text]`

The text to show is either supplied as arguments or read from stdin if no arguments are given.

## Options

```
-h  show this help
-b  set background color (default: gray)
-c  set text color (default: white)
-g  set position of toast: [top, middle, or bottom] (default: middle)
-s  only show the toast for a short while
```

## Note

Color can be a standard name (i.e. red) or 6 / 8 digit hex value (i.e. "#FF0000" or "#FFFF0000") where order is (AA)RRGGBB. Invalid color will revert to default value.
