

Termux-sensor

From Termux Wiki

Jump to: [navigation](#), [search](#)

Get information about types of sensors as well as live data.

Usage

`termux-sensor [options]`

Output displayed in json format.

Options

<code>-h, help</code>	Show this help
<code>-a, all</code>	Listen to all sensors (WARNING! may have battery impact)
<code>-c, cleanup</code>	Perform cleanup (release sensor resources)
<code>-l, list</code>	Show list of available sensors
<code>-s, sensors [,,,]</code>	Sensors to listen to (can contain just partial name)
<code>-d, delay [ms]</code>	Delay time in milliseconds before receiving new sensor update
<code>-n, limit [num]</code>	Number of times to read sensor(s) (default: continuous) (min: 1)

Note

Different devices have different sensors. Check the available sensors for your device with command `termux-sensor -l`.
