Termux-location

Jump to: <u>navigation</u>, <u>search</u>

Get the device location.

Usage

termux-location [-p provider] [-r request]

Output displayed in json format.

Options

```
-p provider   location provider [gps/network/passive] (default: gps)
-r request    kind of request to make [once/last/updates] (default: once)
```

Note

- GPS likely will not work in buildings as device must be exposed to satellite signal.

- GPS also requires that your device clock is set correctly. For the answer to question why, learn how GPS works.

- Do not expect immediate location result. Even network location request may take some time.
