Termux-sms-send

Send a SMS message to the specified recipient number(s).

Usage

termux-sms-send -n number[,number2,number3,...] [text]

The text to send is either supplied as arguments or read from stdin if no arguments are given.

Options

```
-n number(s)  recipient number(s) - separate multiple numbers by commas
```

Note

Usage of this API is no longer allowed by Google and we had to disable it to prevent delisting of Termux:API application from the Google Play.

The return message is

```
{"error": "Sending SMS is no longer permitted by Google"}
```
